

"URNEE" CREMATION URN

The loss of a pet is an inevitable occurrence that veterinarians must confront in their daily practice. This a very traumatic experience for many people. Veterinarians need to be prepared to provide dignified and professional care of the pet's remains.

An increasing number of clients are requesting the return of their pet's ashes from cremation. No longer does the veterinarian need to be using old drug boxes or coffee cans. JorVet now provides a line of products designed to show that the veterinarian really does care and is willing to provide this additional service.

JorVet™ introduces an attractive and durable, but very low cost cremation urn.

The Main Features:

- Attractive shape and color decorated with a raised relief rose centered on top.
- Insert area for a memorable photo with snap-in cover.
- Virtually unbreakable. Made from a heavy injection molded resin.
- Inexpensive - costs about 1/4 of other urns.
- Two sizes; animals under 15 lbs and one for animals 15 lbs to 100 lbs.
- Each urn is complete with a poly bag and tie for secure containment.

Many cremation urns presently used are very expensive human urns or inappropriate items such as coffee tins.

The "Urnee" will satisfy the esthetic requirements but at a cost low enough for routine use in returning crematory ashes.
