

GLYCOFLEX®

STAGE 2 Moderate Strength

Perna, Glucosamine, MSM and DMG for intermediate joint support

Glyco FLEX® 2 Canine represents Stage 2 of our comprehensive stage of life program for dogs needing moderate joint support. It's also recommended for adult and maturing dogs, sporting breeds, and working breeds, as well as well as a follow-up to support normal recovery after orthopedic surgery.

GlycOmega™ is Perna canaliculus from an exclusive New Zealand source. Unlike Perna extract-based products and mussel powders that may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), the entire organism is utilized in **Glyco FLEX®**. Only **Glyco FLEX®** products are formulated with GlycOmega™ Perna.

Glyco FLEX® chewable tablets come in a roast chicken flavor that is highly palatable for easier delivery.

PRODUCT DETAILS:

Glyco FLEX® 2 Canine represents Stage 2 of our comprehensive stage of life program for dogs needing moderate joint support. These delicious natural imitation roast chicken flavored chewable tablets are also recommended for adult and maturing dogs, sporting and working breeds as well as support normal recovery after orthopedic surgery.

0900886.120
