

Mobility FLEX™

VETERINARIAN FORMULA

DIRECTIONS FOR USE:

0-30 lbs:	1 chew daily
31-60 lbs:	2 chews daily
61+ lbs:	4 chews daily

Active Ingredients Per Chew:

Proprietary Blend [Corydalis Yanhusuo Rhizome, Devil's Claw (Harpagophytum procumbens) Extract, Boswellia serrata Extract, Bromelain]	785 mg
Methylsulfonylmethane (MSM). . .	250 mg
Perna Canaliculus (GlycOmega™ brand Green Lipped Mussel). . .	250 mg
RST 247 [Oil Blend, Soy Lecithin, Cranberry Powder]	50 mg

Inactive Ingredients: arabic gum, brewers yeast, calcium sulfate, canola oil, chicken liver flavor, citric acid, citrus pectin, glycerin, maltodextrin, mixed tocopherols, oat flour, propionic acid, rosemary extract, rye flour, silicon dioxide, sodium alginate, sorbic acid, soy lecithin, vegetable oil, water.

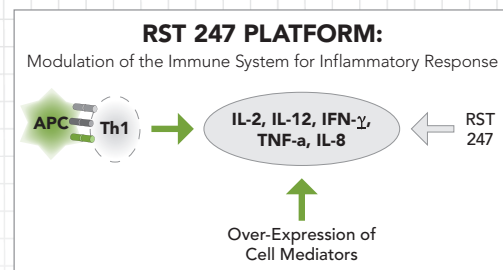

GlycOmega™ is a Trademark of Aroma New Zealand LTD.

Mobility FLEX™ is a nutritional supplement that supports joint, immune system, and vascular health after surgery or trauma in both dogs and cats.

INGREDIENTS OF INTEREST:

RST 247

» RST 247 is a blend of proprietary oils formulated from 3 specific oils containing unsaponifiable lipids, essential fatty acids, and Ricinoleic Acid, which support a healthy inflammatory response and microbial environment in the gut. RST 247 also contains hydroxy fatty acids, phenolic fatty acids, and alcohols that function as gut regulators, as well as acting against gram-negative bacteria.

» The cranberry in this blend contains proanthocyanidin complexes, which provide a wide range of protective properties, including immune modulation, detoxification, protection from lipid peroxidation, and improving capillary permeability and fragility.

» RST 247 can help restore cell membranes, provide better immune response, improved gastric and intestinal integrity, and improve intestinal digestion and nutrient absorption, as well as reduce irritation of the intestinal tract. This ingredient has shown positive improvement in stressed animals with compromised immune and GI tracts. By optimizing the conditions within the gut, there is more efficient absorption and utilization of the therapeutic actives.

COMBINES:

» Corydalis

Corydalis has been studied for its swift response in helping the body deal with both acute and chronic joint discomfort. In laboratory research, it has been shown to exhibit a wide number of actions on the central nervous system.

» Devil's Claw

Devil's Claw has been used for thousands of years in Africa for fever, joint discomfort, and skin conditions. It supports joint flexibility and comfort because of its ability to promote the production of favorable prostaglandins and leukotrienes.

» Boswellia serrata

Boswellia serrata maintains proper prostaglandin levels and helps the body manage 5-lipoxygenase chemicals and leukotriene synthesis. Boswellia also provides antioxidant protection and supports the immune system.

» Bromelain

Bromelain is a proteolytic enzyme that breaks down fibrin, which promotes healthy blood flow. It also supports joint comfort by helping the body inhibit the prostaglandins that contribute to discomfort.

» MSM

MSM is an organic source of sulfur that supports a healthy inflammatory response and joint comfort. It also supports the production of antioxidants.

» Perna canaliculus (GlycOmega™ brand Green Lipped Mussel)

Perna canaliculus is a natural source of chondroitin 4 and 6 sulfates, hyaluronic acid, essential and non-essential amino acids, naturally chelated minerals, vitamins, and omega 3, 6 and 9 fatty acids. These important nutrients support synovial fluid viscosity, flexibility, and tensile strength of the articular cartilage. Extensive clinical use in dogs, cats, and horses has led to improved mobility, range of motion, and comfort level of the animals.
