Element HT5™

Veterinary Hematology Analyzer

EASY TO USE

- Results within 60 seconds including a true 5-part White Blood Cell differential, Red Blood Cell and Platelet parameters, from a 15 µL sample.

- Large, color touch screen with intuitive navigation simplifies patient data entry and viewing results.

- Simple reagent management via bar-code scanner and on-board menu functions. Internal reagent storage saves space and reduces clutter.

- View numeric results, histograms and scatter plots.

BEST-IN-CLASS TECHNOLOGY

- Laser flow cytometry, impedance counter and colorimetric detection.

- Triple angle laser scatter detects white blood cell volume, complexity and granularity.

- Three discrete measurement channels combine to give you a true 5-part differential.

- Intelligent flagging with Sample Pathology Messaging.
