Dear Customer,

Our records indicate that you may have purchased several autoclave pouches with an expiration date that reflects the manufacturer's original product dating of two (2) years, and these products may have reached or are about to reach their originally marked dating.

We have received feedback from the products' manufacturer that additional testing completed, shows that the product life can be extended and is acceptable for use for an additional three (3) years from the date of manufacture currently listed on the packaging.

Products & lots impacted by this are as follows:
