

Nov 02, 2023

Dear Customer,

Elanco is committed to providing you with the best products and services to support your practice and ensure the well-being of your patients. This letter is intended to inform you about an important update regarding one of our products – Zorbium (buprenorphine transdermal solution).

As of January 2023, the shelf life for Zorbium was extended from 18 months to 24 months, with alignment from the FDA. This change was made based on our extensive research and stability testing, ensuring that the product maintains its quality and efficacy for the extended period. Therefore, you can expect that all batches manufactured as of January 2023 will have 24 month expiration dating on the product label. The new expiration dating is also appropriate for the specific batches manufactured prior to 2023, as indicated in the tables below.
