**Works on the pests on cattle  
AND on the next generation.**

**Just one application!**

**Simply apply 3 ml/100 lbs of  
body weight\*.**

**Apply down back and  
face of cattle.  
No dilution necessary.**

**The permethrin kills the pests  
currently on the animal and the  
diflubenzuron inhibits lice eggs  
from hatching into healthy  
adults.**

\*Max dose 30 ml.

**IGR pour-on**

**Prevents lice  
reinfestation**

**Strongest concentration  
of diflubenzuron available  
in a pour-on**

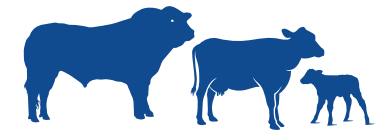

**5% Permethrin  
5% Diflubenzuron**

No withdrawal period

No milk disposal

Approved for dairy and  
beef cattle and calves
