Instant Off-Invoice Credits
September 1 - November 30, 2019

Program Qualifications: Qualifying purchase (case lots) must be made on one order during the effective time period of September 1 - November 30, 2019. Qualifying products must be purchased through an authorized Huvepharma distributor. Entities such as swine and poultry integrators and operations on volume pricing or bids do not qualify on this program. Purchase must be invoiced and shipped within the effective time period from an authorized distributor. Backorders do not qualify.

Distributor must submit proof of sale and discounts (invoice or invoice reports) to Huvepharma, no later than December 13, 2019. Please allow 2 to 4 weeks for credit reimbursement. Huvepharma reserves the right to change or cancel this promotion at any time and for any reason.

Featured Products

PULMO-GUARD® PHM-1
Mannheimia Haemolytica-Pasteurella Multocida Bacterin-Toxoid
• Ready to use, single dose
• Approved for use in healthy cattle of all ages
• Sub-Q administration; 2 mL dose
• Multiple isolates, cell-associated antigens plus a leukotoxoid
• No antibiotic restrictions

KLEBVAX® SRP®
Klebsiella pneumoniae bacterin
• Effective vaccination of healthy cattle 22 months or older against mastitis caused by Klebsiella pneumoniae.
• Re-vaccinate in 2 - 4 weeks. Heifers should receive first dose 30 days after calving.
• Dry cows should be vaccinated twice before calving.
• Whole-herd vaccination may be done at any stage of lactation.

I-SITE XP®
Moraxella bovis bacterin
• Contains eight M. bovis isolates for broad protection
• Safe to use in lactating and pregnant cows
• May vaccinate the herd while treating infected cattle
• Shortens disease duration and severity

MORAXELLA BOVOCULI BACTERIN
Moraxella bovoculi bacterin
• Ready to use. Faster and more convenient than ordering and managing autogenous vaccines
• Expands your pinkeye prevention protocol
• Formulated with eight (8) different highly antigenic isolates of M. bovoculi
• Proven safe and effective
